10x Custom PCR Master Mix - No Taq

Description: The 10x Custom PCR Master Mix is a ready-to-use master mix. It is a convenient way of amplifying DNA fragments without the need to thaw individual components, reducing the risk of contamination and pipetting errors. dNTPs, reaction buffer and magnesium chloride are all present in the mix.

Ordering Information:
SM-0005 1 x 1.0ml Vial 200 x 50μl reactions

Kit Components: Each vial contains 1.0ml of a 10x working concentration PCR Master Mix sufficient for 200 x 50μl reactions. The addition of the template, Taq DNA polymerase and primers results in a final reaction volume of 50μl, containing:

- 45mM Tris-HCl (pH 8.8 at 25°C)
- 11mM (NH₄)₂SO₄
- 4.5mM MgCl₂
- 0.113mg/ml BSA
- 4.4μM EDTA
- 1.0mM each of dATP, dCTP, dGTP and dTTP

Protocol: For a 50μl reaction, take 5μl of PCR Master Mix and add DNA polymerase, template, primers and water in a 45μl volume (scale up or down accordingly if required).

Storage Conditions: Store at -20°C until ready for use for up to 1 year. Avoid freeze thawing. Shipped on ice.
